<b>Preface</b>	<b>i</b>
<b>List of examples</b>	<b>ix</b>
<b>1 PRELIS procedures</b>	<b>1</b>
1.1 Data	1
1.2 Variables	2
1.3 Correlations	2
1.4 Matrices	3
1.5 Output	3
1.6 Three types of variables	4
1.7 Choosing the type of correlation matrix to analyze	7
1.8 A Monte Carlo study of six correlation measures for ordinal variables	8
1.9 An experiment with variables of different scale types	10
1.10 Six types of moment matrices	18
1.11 Producing weight matrices and fit functions	25
<b>2 General instructions for the problem run</b>	<b>31</b>
2.1 Single group analysis	31
2.2 Files	32
2.3 Command names	32
2.4 Options and keywords	33
2.5 Physical lines	35
2.6 Order of commands	35
2.7 Order of computations	36
2.8 Workspace	36
2.9 Restrictions	37
2.10 Stacked problems in one run	37
2.11 How to use FORTRAN formats	38
2.12 Practical advice about data screening	44
2.13 System Files	44
<b>3 PRELIS commands</b>	
Title Title	45
DA Data specifications	47
LA Labels	50
RA Raw data	54
OR,CO,CA,CB,CE,FI Scale type of variables	58
RE Recode	61
CL Category labels	64
NE Define a new variable	66
PO,LO Power and log transformations	69
SC Select cases	71
SD Select cases and delete variables	74
IM Impute missing values	76
MI Missing value	79
WE Weight variable	81
HT Homogeneity test	84
ET Estimate equal thresholds	85
FT Fixed thresholds	86

MT	Marginal thresholds	88
RO	Regression	89
OU	Output	91
<b>4</b>	<b>Examples and exercises</b>	<b>101</b>
4.1	Compute matrix of polyserial and polychoric correlations (MA=PM)	101
4.2	Logarithmic transformations and recoding of variables	108
4.3	Select cases, estimate augmented moment matrix (MA=AM)	109
4.4	Polychoric correlation matrix with all variables ordinal (MA=PM)	111
4.7	Tetrachoric correlations, with asymptotic variances estimated from grouped data	115
4.5	Censored variables	118
4.6	Estimated regressions	120
4.8	Estimating asymptotic variances and covariances, MA=CM	124
4.9	Estimating asymptotic variances and covariances, MA=KM	127
4.10	Estimating asymptotic variances and covariances, MA=PM	128
<b>A</b>	<b>Warnings and error Messages</b>	<b>131</b>
A.1	Syntax errors	132
A.2	Warning messages	133
A.3	Fatal errors: problem stop	137
A.4	Fatal errors: program stop	140
<b>B</b>	<b>New features in PRELIS 2</b>	<b>143</b>
B.1	Compatibility with PRELIS 1	143
B.2	Faster execution	144
B.3	Data screening and summarization	145
B.4	Variables and scale types	146
B.5	Labels for categories	147
B.6	Frequencies, percentages, bar charts, histograms	148
B.7	Extension of the select cases command	149
B.8	Improvement of the recode command	150
B.9	Specification of missing values	152
B.10	Imputation of missing values	153
B.11	Simplified syntax for reading and saving matrices	158
B.12	Saving the raw data	159
B.13	New variables	160
B.14	Merging files	162
B.15	Order of computations	164
B.16	Tests of univariate and multivariate normality	166
B.17	Rank correlations and tau-c correlations	167
B.18	Asymptotic covariance matrices	167
B.19	Bootstrap estimates	171
B.20	Homogeneity tests for categorical variables	173
B.21	Thresholds	176
B.22	Multivariate multinomial probit regressions	178
<b>C</b>	<b>Simulation with PRELIS 2 and LISREL 8</b>	<b>183</b>
C.1	Introduction	183
C.2	Bootstrapping	184
C.3	Monte Carlo experiments	189
<b>D</b>	<b>Syntax Overview</b>	<b>205</b>
	<b>References</b>	<b>211</b>
	<b>Author index</b>	<b>217</b>
	<b>Subject index</b>	<b>219</b>
